

A ONE-TOUCH SOLUTION FOR ON-DEMAND SERVICE

Contact Anyone, Anywhere Onsite!

Communication with your customers or between staff members is vital in any industry. The Button Butler is an onsite paging solution that lets guests or staff request assistance with the simple push of a button.

How Does It Work?

1. A customer or staff presses the "Service" button on the Button Butler.
2. A message is sent to an LRS staff/server alphanumeric pager.
3. Staff or server responds immediately to the service request.
4. The pager repages until the page is cancelled.
5. The staff or server cancels the page by holding the pager magnet over the "Service" button for 1 second.

Button Butler Push-For-Service system has various applications:

- Restaurants – Smoking Service
- Beergardens
- Hotels
- Beach/Resort
- Conference Rooms
